

Prepare for Darker Mornings This Winter

WAYS TO HELP KEEP OUR TIGERS AND CUBS SAFE

PLAN A SAFE ROUTE:
Choose well-lit streets, sidewalks, and marked crosswalks. Review road rules and safe crossing.

BE VISIBLE:
Add reflective strips, clip-on lights, or a small flashlight to backpacks and lunch bags. Cyclists should use reflective gear & front and rear lights.

STAY ALERT:
Leave extra travel time. Put away phones and earbuds. Stop, look, and listen before crossing.

During December and January, the sun will rise between 8:24am - 8:46am.

42% of crashes involving pedestrians occur from October through January, per ICBC.

DRIVING IN THE MORNINGS:

Use headlights, check wipers, slow down near schools, bus stops, and crosswalks, stop completely, and check carefully for pedestrians and cyclists. Give extra time and attention during the morning commute.
